

## WILLSON

### Bass Trombone 510TA

This in-line trombone features the sensational ROTAX valves. There is room for the ROTAX rotor in a conventional valve casing and yet it still provides 100% air flow thanks to its compensated flow geometry. The ROTAX rotor has no troublesome constrictions and over-scaling.

The mechanism is equipped with a smooth, precise and noise-free Rotohead system.

#### Specifications:

- Pitch: Bb / F
- Bore: 14,30mm / 0.562"
- Bell diameter:  
265mm / 10.43"
