

WILLSON Bass Trombone 550TA

This in-line "independent" trombone features the sensational ROTAX valves. There is room for the ROTAX rotors in a conventional valve casing and yet they still provide 100% air flow thanks to their compensated flow geometry. The ROTAX rotors have no troublesome constrictions and over-scaling.

The mechanism is equipped with a smooth, precise and noise-free Rotohead system.

Specifications:

- Pitch: Bb / F / Gb
- Bore: 14,30mm / 0.562"
- Bell diameter:
265mm / 10.43"
- Rotax rotors
- Rotohead system
- Bell: yellow brass or red brass
- Outer slide: nickel silver
- Inner slide: chromium-coated
- Slide can be dismantled
