

WILLSON CC Tuba 3050 RZ-5

This tuba features the sensational ROTAX valves.

There is room for the ROTAX rotors in a conventional valve casing and yet they still provide 100% air flow thanks to their compensated flow geometry. The ROTAX rotors have no troublesome constrictions and over-scaling.

The mechanism is equipped with a smooth, precise and noise-free Rotohead system.

Specifications:

- Pitch: C
- Bore: 19,5mm / 0.767"
- Weight: 11,5kg / 25.3 lbs
